Asignación de tareas

Asignación de tareas, formulario web.

Asignación de tareas

Código: quién no está disponible para realizar una tarea

```
protected function whoIsUnavailable ($date, $position id, $task id) {
 //convert received date to Carbon format
 $carbonDate = (Carbon::createFromFormat('Y-m-d', $date)->startOfDay());
 //filter inactive employees
  $inact = Employee::where('active', 0)->get()->pluck('id');
 //Filter employee ids who are absent
   $abss = Absence::
    where ('start date time', '<=', $carbonDate) ->
    where ('end date time', '>=', $carbonDate) ->
    get()->pluck('id');
 //filter employees doing a task on $date
   $onduty = EmployeeTask::
    where ('date time', '=', $carbonDate) ->
    get()->pluck('employee id');
```

Código: quién no está disponible para realizar una tarea

```
//filter employees who have a day off after task
 $beforeDutyDate = $carbonDate->subDay();
 $afterDuty = DB::table('employee tasks')->
  where( 'date time', '=', $beforeDutyDate)->
  where(function ($query) {
       $query->
           where ( 'task id', '=', 1)->
           orWhere( 'task id', '=', 2);})->
  get()->
  pluck('employee id');
//merge ids
$id = $inact->merge($abss);
$id = $id->merge($onduty);
$id = $id->merge($afterDuty);
$id = $id->unique();
  $ids = $id->toArray();
 //No value to send
  if (!isset($id)) {
      return ;
   }else{
      return $ids;
```
